

INSTRUMENTATION PARTS OEM

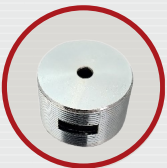

We manufacture component such as adapters, NPT fitting, brackets, probes & other parts as per design for

- Pressure switches pressure transmitters & transducers
- Vacuum switches/sensor
- Level switches & level transmitters
- Vibrating forks/rods
- Temperature sensor

Our products

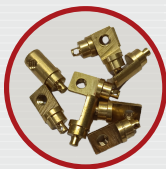

Parts used in instrumentation

- Flow sensors & flow switches
- Capacitive level switches & sensor
- Differential pressure switches & compound switches
- Accelerometers and vibration sensors
- Strain sensors

Our products

Processes

- Sand casting, shell casting, pressure die casting, lost wax
- Casting & forging
- Parts from extrusion profiles
- Precision machine workshop- 3 & 4 axis CNC, VMC, and SPM machines with a high degree of accuracy & repeatability
- Sheet metal pressing stamping, bending, punching

Materials

- Brass bronze & copper alloys
- Zinc & aluminum alloys
- Mild/stainless steel alloys
- Non metals such as PEEK plastic, delrin, nylon, teflon, silicon rubber

Finish

- Powder coating EVD
- Electroplating
- Electropolishing
- Buffing/shot blasting
-

Quality

- Raw material inspection
- In-line production QC
- Lot wise material grade traceability from raw material to finished
- Electrical mechanical & corrosion tests such as conductivity, torque, hardness, SST
